

New Course in Arctic Field Ecology

BIO 332H (Biology Field Research)

27 July to 10 August 2022

Learn about northern ecosystems at the edge of the Arctic! UTM will be offering a 0.5 credit summer field course at the Churchill Northern Studies Centre (<https://churchillscience.ca/>) near Churchill MB, on Hudson Bay. Students will visit and learn about tundra, treeline, boreal forest, and coastal habitats, and will experience arctic and subarctic landscapes, vegetation, and wildlife.

Estimated costs are \$1246 (room and board) plus the regular course fee. You also will be responsible for airfare (usually ~\$1600; \$2231 last year).

Enrolment begins on 16 March 2022 through these links:

<https://forms.office.com/r/BWXgU1xBLs> (UofT Students)

<https://forms.office.com/r/wEPHvTx64T> (non-UofT Students)

Please contact the lead instructor, Prof. P.M. Kotanen (peter.kotanen@utoronto.ca) for further details.
